NOTICE OF RULE ADOPTION RULE 67.7 - CUTBACK AND EMULSIFIED ASPHALTS (Amendment)

The Air Pollution Control Board adopted amendments to Rule 67.7 which became effective May 21, 1991. Rule 67.7 is an existing rule regulating emissions from the application and sale of cutback and emulsified asphalts. The amendments will correct deficiencies identified by the Environmental Protection Agency in the current rule as well as add labeling requirements and make certain clarifications to the rule. The amendments will accomplish the following:

- Require that containers for asphalt that are to be shipped out of San Diego County be labeled as such in order to be exempt.
- Revise the VOC definition to be consistent with other District rules and EPA requirements.
- Add additional compounds that are exempt from regulation because they are not ozone precursors.
- Add recordkeeping requirements that a current list of all asphalt materials used, and MSDS or manufacturer specifications must be maintained. All such records must be maintained for at least three years.

If you would like a copy of the rule, call Juanita Ogata at (619) 694-3307. If you have any questions concerning this Advisory, contact the District's Enforcement Division at (619) 694-3340.
